PROCUREMENT BRIEF FOR RESELLERS

Wholesale PlayStation Store gift cards, with the operating boundaries made clear

PSN:B2B is an **independent B2B supplier**, not Sony or an affiliate of Sony. This brief explains the current account terms, catalog workflow, delivery conditions, and the checks a reseller should complete before placing an order.

12	15%	See terms
REGIONAL CATALOGS	STARTING DISCOUNT	BALANCE TOP-UP
Region-specific denominations	Applied to the live account catalog	Check current top-up terms

How a catalog order works

1	**Create an account** The account shows the current discount and gives access to live catalog pricing.
2	**Check region and stock** Match every SKU to the customer's PlayStation account region and review current availability.
3	**Fund the balance** Check the current minimum top-up before paying. Payment confirmation is required before allocation.
4	**Place the order** Delivery follows payment confirmation, internal checks, and successful stock allocation.

Account discount tiers

Cumulative purchases	Account discount	Operational note
Starting tier	15%	Visible after account access
From $1,000	16%	Does not reserve stock
From $5,000	17%	Current catalog price still applies
From $10,000	18%	Availability remains SKU-specific

BUYER CONTROLS

What to verify before you buy

The live authenticated catalog is the working source for price and stock. These checks reduce region mismatch, unsupported expectations, and avoidable claim delays.

Review the current wholesale route and live commercial explanation — Open wholesale overview

Region compatibility

A PlayStation Store code is region-specific. Confirm the customer's account country before selecting a catalog and denomination.

Live price and stock

A tier changes the account discount; it does not reserve inventory or freeze a future SKU price. Recheck the catalog at order time.

Delivery condition

Codes are released only after payment confirmation, internal checks, and successful stock allocation. No timing is guaranteed in this brief.

Code claims

Submit the code, order details, redemption error, and supporting evidence through the published claim path within the 7-day submission window.

Choose the route that matches the task

Need	Use	What it answers
Browse current catalog	Store	Regions, denominations, current stock; account access reveals price
Assess a possible integration	API status	Current web-order path, availability boundary, and requirements to confirm before development
Report a code issue	Code support	Evidence checklist, claim path, and submission window
Review operating boundaries	Trust center	Supplier role, payment, delivery, region, and support boundaries

Reseller pre-order checklist

1. Customer account region confirmed	2. Denomination and quantity confirmed
3. Live catalog price and stock rechecked	4. Claim evidence path shared with support staff

PSN:B2B is an independent supplier. PlayStation and related marks belong to their respective owners. This document is an operational overview, not a stock reservation, price lock, delivery guarantee, or automatic claim outcome.
